

What's Going On — The Whole Book on One Page

A plain English guide to American politics. Every claim from court records, congressional reports, or major newspapers.

The Three Big Ideas

- 1. The What.** A small group of very wealthy people has spent 40 years building the machinery to control America's courts, government, and Constitution — instead of winning elections the normal way.
- 2. The Why.** Their voters are a shrinking minority, so they built ways to win without the most votes: courts, gerrymandering, voter rules, the Electoral College, the Senate.
- 3. Where It Leads.** The movement's own writers openly propose replacing constitutional democracy. They publish books about it. The Vice President cites them by name.

The Five Parts, One Line Each

- **The framework:** check every claim's evidence tier — Tier 1 documented, Tier 2 strongly reported, Tier 3 allegation.
- **Who is behind it:** a few donor families, one legal network, a secretive council, and a right-turned Silicon Valley.
- **What they are doing:** captured courts, a replaced civil service, and a state-by-state push to rewrite the Constitution.
- **How they won:** data targeting, Russian interference, January 6, and elite impunity — all in the court record.
- **Where we stand:** it is happening in the open; the response is local and boring — and it works.

Six Names to Know

- **Leonard Leo** — built the judge pipeline; controls a \$1.6B dark-money trust.
- **Peter Thiel** — funded the Vice President's career; owns Palantir.
- **Robert Mercer** — paid for Cambridge Analytica and Breitbart.
- **Charles Koch** — 50 years of funding state-level politics.
- **Russell Vought** — wrote much of Project 2025; runs federal spending.
- **Mark Meckler** — leads the constitutional-convention campaign.

Three Things You Can Do

- **Vote in every election** — especially state legislative primaries, where one vote counts 20–50× more.
- **Know your state legislators by name** — find them at openstates.org. Five calls about one bill is a lot to them.
- **Subscribe to a local newspaper** — it is the early-warning system for everything on this page.

How to Read Any Political Claim

- **Tier 1:** court records, sworn testimony — trust it.
- **Tier 2:** major outlets, named sources — solid, cite the outlet.
- **Tier 3:** unproven allegation — do not repeat as fact.
- If nobody can tell you the tier, treat it as Tier 3.

Remember

- This is not a conspiracy theory — the people involved publish their plans.
- Do not panic. Do not tune out. Both help them.
- Almost nobody you know has heard most of this. Tell them.
